

Manufacturing in Ningbo, China

From December 2010 we started up our new manufacturing site in the city of Ningbo, south of Shanghai. Our skilled personnel working in production, technical engineering, supply chain and other functions have experience from electronic manufacturing in China or from European sister companies.

Focus is on complex products with high manufacturing/assembly requirements in mechanics, electronics and professional function testing.

Our aim is to support the customer both from Europe and China by providing

- right quality
- best value
- optimized costs
- on time delivery

A leading international supplier of electronic manufacturing services – providing the entire value chain.

Serving professional customers mainly with high complexity manufacturing.

Focusing on the following market segments:

- Data/Telecoms
- Defence/Aerospace
- Energy
- Industry
- Medical equipment
- Offshore/Marine

Manufacturing area: 4 000 m²
FTE: 22 (Mar 2011), 130 (planned 2013)

Location: Ningbo, China
(about 220 km south of Shanghai)

Segment focus:

- Industry
- Medical equipment
- Energy
- Data/Telecoms
- Offshore/Marine

Key Competencies:

- Mechanical assembly
- Electromechanical assembly
- PCBA production (SMT, Selective soldering, ICT test, Cleaning/Coating, X-ray)
- High-level assembly, box-build and system
