

Prototype manufacturing

Many years of manufacturing professional electronics for demanding customers have given us unique experience in prototype manufacturing. Our knowledge will improve the producibility, quality and total cost of your product. We have a dedicated team and manufacturing line for the production of prototypes. Every project will have a dedicated technical single point of contact. As one of the major electronic manufacturing services (EMS) in Scandinavia we have a wide range of components in stock, to ensure fast delivery of prototypes.

Our aim is to give you the best possible quality and services, and to deliver prototypes when you need them!

A leading international supplier of electronic manufacturing services – providing the entire value chain.

Serving professional customers mainly with high complexity manufacturing.

Focusing on the following market segments:

- Data/Telecoms
- Defence/Aerospace
- Energy
- Industry
- Medical equipment
- Offshore/Marine

Manufacturing

- PBA prototypes
 - SMT and THT lines
 - Manual assembly
- Box-build / HLA
- Leadfree & Lead process
- Backplane
- AOI
- X-ray
- Conformal & Parylene coating
- Washing
- Moulding & Glueing
- Coil winding
- Optical assembly
- Micro mechanical assembly
- Dispensing
- Diebonding
- Wirebonding (AU, AL, wire, ribbon)
- Sealing (gel, globetop, hermetic)
- Wafersawing
- Plasma cleaning

Services

- Dedicated project staff
- Design for manufacturability
- Product verification
- Lean production
- Component analysis
- Test strategy analysis
- Test development
- Environmental testing
- Global sourcing
- Supply chain support
